All we need is road
Native Americans use coal and the naturally occurring “oil seeps” found in Pennsylvania.

1859 – Titusville, PA  Edwin Drake strikes oil by re-deploying existing water and salt drilling technology.

1860s — The Pennsylvania Railroad transports kerosene via rail.

2015 – Pennsylvania: Compass Natural Gas delivers trucked CNG to Pennsylvania customers.
THE INNOVATION CHALLENGE

Marcellus Shale gas

Virtuous Cycles of Innovation

Create demand
Lower energy bills
Economic development
Replace foreign energy purchases
A cleaner fuel

HALF OF PENNSYLVANIA HAS NO ACCESS TO NATURAL GAS
REDEPLOYING AND MODERNIZING EXISTING TECHNOLOGIES,

CREATIVELY RECONFIGURING AND INTEGRATING THEM...

...WHILE USING THE INFRASTRUCTURE ALREADY IN PLACE:

THE ROADS
COMPASS NATURAL GAS: ENERGY FOR THE 21ST CENTURY

All we need is road
Safe, reliable, economic non-pipeline delivery of Marcellus natural gas to PA customers.

Commonwealth Benefits
Keeping a portion of the half trillion energy dollars spent overseas at home; considerably reduced emissions at the "tailpipe"; and considerably reduced systemic emissions by radically shortening the wellhead to burner-tip distance.

Customer Benefits
Affordable, domestic, clean and safe. Independence from pipeline installation costs and inflexibility.
